

Envirologic Bioflush - 55 gal RC55

Details

EnviroLogic BioFlush is a carefully designed fluid which helps to flush and remove petroleum oil from hydraulic systems. This is done when converting hydraulic systems to the use of environmentally safe, biodegradable fluids. EnviroLogic BioFlush will condition the internal hydraulic system to optimize both overall system performance and fluid biodegradability. Fill equipment with Bioflush, run equipment for 15 minutes, drain and equipment is then ready for Biolube.

- Conditions hydraulic system to optimize performance
- Flushes and removes petroleum oil from hydraulic systems
- Use when converting to biodegradable fluids
- Follow with Biolube
