

Corona Duallink Bypass Loppers - 31in. RCSL8180

Precision made MAXForged tools use a forging process that compacts steel molecules into Corona's strongest, most durable garden cutting tools.

All steel handles with extra long grips for max control.

The forged steel Duallink compound action design adds leverage, giving the tool more power, for easier cutting through branches without any extra effort.

Details

The Max Forged DualLink Bypass Loppers features a compound-action cutting head to cut through wood up to 2 inches. The cutting head will multiply force on each cut by up to 3 times without extra effort making it much easier than with a conventional lopper. Fully forged steel construction for strength. Comfortable handle with contoured soft grip to fit all hand sizes. The shock-absorbing integrated bumper cushions each pruning cut. Easy to resharpen, if necessary. No-fail metal end cap. 2in. Capacity. 31in Steel Handles.

- Precision Made Max Forged Steel Construction for Strength
- Max Forged Blade Stays Sharp
