

Fimco Poly Lawn Roller - 24in x 48in

RFLRP2448

Details

Lawn rollers level turf to combat the effects of freezing, burrowing animals, wheel track ruts, and can be used for packing seeding and soil for newly laid sod. The durable polyethylene roller drum resists rust and dents. The steel roller drum and end cap are manufactured with heavy, 14-gauge steel. Fill with water or sand. Rollers are lightweight when empty for easy transport and storage. Rounded end caps prevent gouging or marking. Includes 1" hitch tubes and tow hitch.

- 48" wide roller drum for fast coverage; 24" diameter
- Rounded End Caps prevent gouging and will not leave ruts
- Polyethylene drum resist rust and dents
- Lightweight when empty, for easy transportation and storage
- 1" hitch tubes and tow hitch
- Common hitch pin attachment for easy use with any vehicle.
- Provides level surface to combat effects of freezing, burrowing animals, and wheel track ruts
- Effective packing of new seeding and soil to root contact for newly laid sod
- 92 lbs, 880 lbs with water
- May be filled with water or sand
