

SUPERTR8 Upgraded 8 Station Triac Module

RG5050

Details

Direct Replacement Boards. No Tools Needed For Seamless Integration.

Technical Features: Equal to or better electronic specifications. Utilizes Motorola triac switches. Surge Protection: R&R boards use SmartBreak serviceable and fast acting M.O.V.s. Also equipped with Link self-resetting fuse. vs. OEM boards use slow reaction pill type. Some boards have no ground terminals. Utilizes old glass Barrel fuse - one shot and it's done! Detachable Output Connector: Yes with R&R! High quality detachable connector allowing for fast installation and removal for maintenance without the risk of station wire mix-ups. vs. OEM boards use no detachable connector. In fact utilizes a low quality fixed connector. The tech. must unscrew each individual connector for removal. Power/Output Indicator lights: R&R Yes. Lights provide easier satellite and field troubleshooting. vs. OEM: No lights. Serviceability: R&R Yes. ServiceSockets allow for field service to the surge protection without the need of removal or soldering iron. vs. OEM: No. All components are soldered directly to the printed circuitry board. Warranty: R&R 2 year. vs. OEM Standard Parts
