

Kochek Dual Range Nozzle - 3/4" - 10-24 gpm w/Bumper RG90016

Details

Provides a straight narrow stream to a fog at 10 GPM before "jumping" to increase volume to 24 GPM at optimum flow. This nozzle creates a misting fog perfect for cooling turf and syringing in light and frequent applications while maintaining reduced flow with high pressure ratings. Great for equipment and stadium washdown at the 10 GPM setting providing a fine, high velocity stream. Constructed of anodized aluminum, stainless steel and rubber for durability. Powder coated. Made in USA.

- Misting perfect for cooling turf
- Jumps from 10 GPM to 24 GPM at optimum flow
- Anodized aluminum, stainless steel and rubber for durability
- Powder coated
- Made in USA
