

Kochek Deluxe Pellet Applicator

RG900BWP-2

Details

Designed to apply pelletized wetting agents, surfactants, adjuvants to turf and ornamentals while being connected to an irrigation water source, the deluxe applicator is uniquely designed with ergonomics in mind. Equipped with a full-time swivel at the supply end, and the handle and ball shut-off provide maximum control and comfort to the operator. The applicator comes with both the flat spray and shower head nozzle. The impact resistant nylon pellet container easily twists on while an O-ring keeps it water tight. Use with 1" or 3/4" hose.
