

Kochek Big Water Wetting Agent Pellets

- CS/12

RG900BWP-P1

Details

This standard pellet addresses and minimizes the causes of heat wilt and stress in turf by lowering surface tension of substrates, allowing even penetration of water moisture and nutrients to the root zone and throughout the soil matrix. A proprietary blend of surfactants and wetting agents help to conserve water usage up to 30%. Use in Standard or Deluxe Pellet Applicator as part of your normal turf grass maintenance activities. Biodegradable. Case/12.
