

Rain Bird I200EFBCP - 2" Efb-Cp Brass Electric Valve 24 Vac BSP RGB33913

Details

Reliable performance even in dirty water applications. Self-flushing filter resists debris build-up. Rugged red brass construction for longer life. Durable, fabric-reinforced diaphragm composed of EPDM, a rubber material which is chlorine and chemical resistant. Normally closed, reverse flow design ensures valve will fail in the closed position if a tear or rip in the diaphragm occurs. Prevents flooding, water waste and landscape damage. Slow closing to prevent water hammer and subsequent system damage. One-piece solenoid design with captured plunger and spring for easy servicing. Prevents loss of parts during field service. Manual internal bleed operates the valve without allowing water into the valve box. Allows pressure regulator adjustment without turning on the controller. Manual external bleed permits flushing debris from the system. Recommended for system start up and other repairs. Contamination-proof, self-flushing filter screen resists debris buildup. Water flow continuously flushes the screen, dislodging particles and debris before they can accumulate and clog the filter. Reclaimed water compatible: all models now feature EPDM diaphragms and chlorine-resistant parts as standard equipment. Three-year trade warranty.
