

# Pocket Punch

RGD50048

### Details

This easy-to-use little irrigation tool fits comfortably in your hand with ergonomic finger grips. The durable stainless steel hole punch pin will punch a clean hole for 1/8" or 1/4" emitters into 1/2" mainline tubing. The insert tool makes short transfer barbs and most emitters with outlet nipples much easier to install. A built-in emitter removal notch quickly removes emitters from tubing. Lightweight. 5-1/4" long.
