

Rain Bird Hv Valve with Non-Flow Control - 1" NPT

RGH00000

Details

Patented, eccentric, balanced pressure, Buna-N diaphragm with self-cleaning 90-mesh (200 micron) pilot water filter and captured stainless steel spring - Eccentric design provides smoother closing, less water hammer. Only four durable, captured multi-drive bonnet screws that come out with half the number of turns for fast and easy servicing - at least twice as fast as the competition. Glass-filled polypropylene body for strength (slip by slip model bodies are PVC). All popular model configurations available. Compact design, 2.54" spin radius for tight installations. Reverse flow, normally closed design. External bleed to manually flush system of dirt and debris during installation and system start-up. Internal bleed for spray-free manual operation. Operates in low-flow and Landscape Drip applications when a 200 mesh filter is installed upstream.

Specifications

Manufacturer	Rain Bird
Box Quantity	20
Package Quantity	1
