

Rain Bird Low Flow DV Valve - 1"

RGX12110

Details

The only valves in the industry made specifically for drip irrigation systems, making these the only valves that can effectively handle particles at low flow rates - patented design. These valves contain all of the features of reliable Rain Bird DV valves, coupled with a unique diaphragm design that allows particles to pass through at extremely low flow rates, thereby preventing weeping of the valve - Allows the filter to be safely placed downstream of the valve since these valves handle all sizes of particles. Unique "double-knife" diaphragm coupled with 1/2" diameter seat for flawless operation at low flow rates. Low Flow Valve is available in 3/4" In-line model. Double-filtered pilot flow design for maximum reliability. External bleed to manually flush the system of dirt and debris during installation and system start-up. Internal bleed for spray-free manual operation.
