

Water Cooler Spigot Guard

RP7602

Details

For security and protection from cross contamination, the Spigot Guard is an essential feature for assuring a safe and sanitary water supply. This spigot features a surrounding shroud which replaces the existing push button spigot. The Spigot Guard automatically closes when not in use, fully protecting the spigot from human hands, animals, insects, and wind-blown or sprinkler contaminants.

- Secure, sanitary spigot
- Spigot Guard automatically closes when not in use
- Spigot Wrench, available separately, assures sanitary installation
