

Quick Dam Flood Bags - 12" x 24" - 2/Bag RQD1224-2

Details

Quick Dams activate and grow to 3.5 inch high sandbag in minutes with a contained super absorbent powder that swells and gels when wet. Compact, lightweight, ready to use and no sand needed. Simply place in the path of problem water and watch a Quick Dam quickly absorb 4 gallons of water. Easily stacks in brick or pyramid formation to build a retaining wall. Provides continuous protection for several months, if needed. Not for salt water use. Reusable. Environmentally friendly. Black. 2 / Bag.

- Patented Water Activated flood bags (Sandless Sandbags) - Just get them wet
- Bags grow to 12in x 24in x 3.5in high
- No need for sand or labor, filling sandbags
- Absorbs 4 gallons of water and grows to full size 3.5in high in 10 minutes
- Contains a super absorbent powder that swells and gels water
- Swelled bags contain, control, and divert flood water
- Stack multiple bags in brick formation to increase wall height
- Safe, non-hazardous, non-toxic
- Leave in place for ongoing protection and use
- Environmentally friendly and decomposes over time
- Not for use with Salt Water- a chemical reaction causes deflation
