

Multi-Blade Cutting Set - 5 Pc Compound Action RTL1002

Details

The high-functioning serrated multi-purpose blade cuts rope, shingles, vinyl tiles or siding, plastics, and more. It comes with an integrated bottle opener, a single strand soft wire cutter and wire bending holes. The straight cutting blade is ideal for metal duct work and gutters, while the cable cutting blade cuts various wires and cables. The standard plier head includes large and small gripping teeth and an integrated wire cutter. There is a multi-purpose blade, a heavy-duty straight cutting blade, a cable cutting blade, and a bonus plier head. The different heads can be changed out easily in about 5 seconds. To change the blade simply unlock the two quick-change pins, insert the new blade, return the pins to locked position and begin work. The base handle also has a compound action design providing more power with less effort, further increasing the tool's appeal. The Crescent Tool SwitchBlade also offers a convenient one hand latch operation and dual material grips, which provide added comfort for the end user. The hang hole on the handle makes for easy storage.
