

Evaporative Cooling Cap

RTN6594

Details

This evaporative cooling cap is designed specifically for people working outdoors to provide 5-10 hours of cooling relief. The 6 panel cap features mesh vents of HyperKewl material integrated directly into the hat inner panels for air circulation and a water repellent nylon liner. To activate, soak in water 1-2 minutes then twist. Low profile hook and loop for size adjustment. Durable and comfortable. One size. Khaki.
