

# Flexible Stake RP401

## Details

Flexible mow-over stakes are ideal for distance, hazard and out of bounds areas and never need to be moved when mowing with reel mowers, tractors or golf carts. Bottom anchor is recommended for increased stability and exact height placement. Anchor also allows easy removal and replacement of stake when boundary changes are necessary. A cut section of Anchor Plug Rope serves as a "stopper" to eliminate dirt and debris filling the anchor opening. Extremely durable and practical. Approx. 17.5"

- Never need to be moved for mowing
- Ideal distance, hazard and out of bounds marker
- Bottom anchor is recommended
- Durable and practical
- Approx 17-1/2" tall
